

maximizing loft space

Hidden assets

Built-ins keep the focus on entertaining in this hip home, once a candy factory.

SIZE
1,100 square feet

WHAT WE LOVE
A new layout combined with attractive storage divvies up this loft to make it multifunctional and well-defined for activities without stripping away the unique loft character.

IDEA TO STEAL
Combine floor-to-ceiling built-ins, small closets and European-style cabinets to optimize storage potential.

Bar Keep Built-in cabinets and shelves transform a small closet near the kitchen into a nicely stocked bar.

Geometry Lesson
A wall-size built-in with a hip design offers open and closed storage to conceal clutter with style.

NATURAL CATCH-ALL
A wicker laundry basket holds cozy throws for cuddling up.

Lovely Illusion A floating bedside table seems to expand space as the wall below stays visible.

Carved Accommodations
Closing off an open area on one side of the loft made way for a much-needed guest bedroom.

SPACE SAVERS

With space at a premium, pocket doors provide privacy as needed and slide discreetly into walls when open.

Made For Entertaining

A sectional sofa, opposite, maximizes seating potential. Pillows on the floor provide additional casual spots to relax and recline.

Do-More Cabinetry

Relocating a bedroom entry allowed for an expanded kitchen with sleek, frameless European cabinets that offer 10 percent more storage space inside than framed cabinetry.
